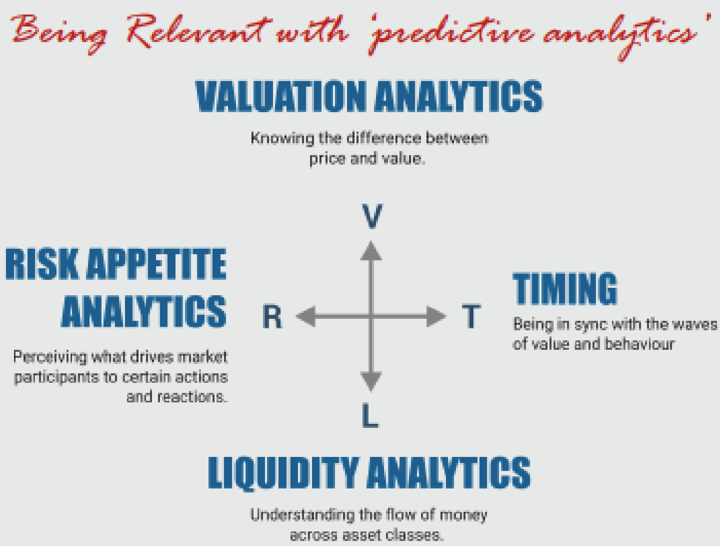
VLRT Framework| Adaptive Money Management



The core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**

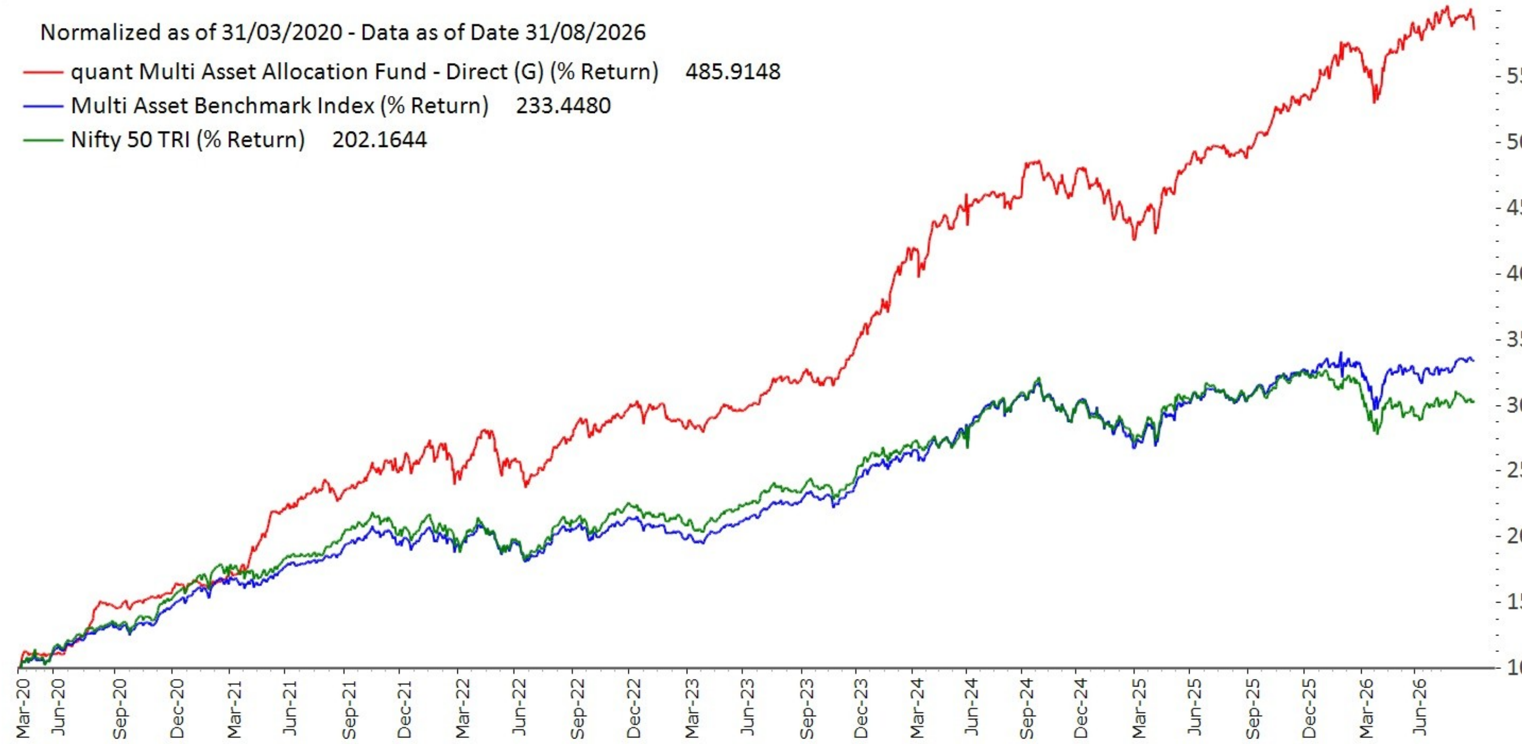
Scheme Returns (as on August 31, 2026)



quant Multi Asset Allocation Fund is a core, all-weather strategy designed for long-term investors with a lower risk appetite who still seek meaningful participation in equity-led wealth creation. The fund enjoys complete flexibility to invest across market capitalisations, sectors, debt securities, and Gold & Silver ETFs—dynamically rotating allocations in response to evolving market conditions. During August 2026, exposure to Oil & Gas (+9.06%) and Healthcare (+1.27%) was increased while Financial Services (-10.18%), IT (-1.59%) and Capital Goods (-1.57%) were reduced. We remain constructive on the long-term precious metals cycle and will look to scale allocations judiciously as market signals turn favourable.
