allocation truly dynamic

- To avail Equity Taxation Minimum 65% equity exposure will maintained
- Derivatives instruments will be used to hedge equity exposure up to 100%
- Suitable for traditional long-term investors
- Nil Exit Load

quant DAAF positioning

- The unique feature of the scheme stems from its mandate to dynamically rebalance equity exposure (0 to 100%) and debt exposure (0 to 35%), in line with our view on Risk-On or Risk-Off environment, to earn superior risk-adjusted returns. quant money managers have full flexibility and can even hedge up to 100% equity exposure by using derivative instruments in extreme risk-off environment
- quant DAAF aims to capture upside in the bull phase and limit the downside in the bear phase and thus reducing the volatility of the overall portfolio
- The scheme provides the widest scope for traditional investors who are prepared to invest for long-term and willing to take call on money managers, who can take calls in both normal as well as extreme environment to generate superior risk-adjusted returns
- As an Adaptive Asset Allocator, we try to gauge prevailing macro environment and try to understand the intensity of both Risk Appetite and Liquidity for various asset classes and accordingly rebalance the portfolio dynamically.
- When both Risk Appetite and Liquidity are at elevated levels, we dynamically increase our equity exposure Similarly, when Risk Appetite and Liquidity are at exhausted levels, we will increase debt exposure substantially
- Our money managers will take prudent steps to allocate towards high quality debt instruments dynamically across maturities. Similarly, equity allocation will be managed dynamically across market caps
- Our time trusted risk-mitigation VLRT Framework and Predictive Analytics indicators will be used to dynamically maximize the opportunities across the portfolio. We have demonstrated the same in the past and emerged as an outlier in most of the categories in which we operate

quant DAAF investment process building a dynamic portfolio

QUART ASSET ALLOCATION FUND

Why is Dynamic Asset Allocation needed?

In a dynamic world and highly volatile markets, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

quant DAAF will dynamically readjust asset allocation on the basis of our "VLRT + Q²" (VLRT with Quantifiable Quality) Framework and Predictive Analytics indicators, for superior risk-adjusted returns. The scheme is unconstrained – i.e., no market cap bias (equity) or maturity bias (debt) Equity Universe Nifty 500

Debt Universe Bonds, G-sec, Money Markets

Global Risk Appetite Analysis and Global Liquidity Analysis to determine the flow of money across asset classes

Indian Risk Appetite Analysis and Domestic Liquidity Analysis to determine whether it is a "Risk-On / Risk-Off" Environment

Risk On Environment – Increase Equity Exposure **Risk Off Environment** – increase Debt Exposure

"VLRT + Q²" VLRT with Quantifiable Quality

> Lastly, it comes down to "Timing" – a function of all our analytical factors

> > quant DAAF Portfolio

quant DAAF investment scenarios

adaptive asset allocation

Debt Exposure (0-35%)

Equity + Derivatives Exposure (0-100%)

active management for unpredictable markets

adaptive alpha strategy across equity, fixed income and derivatives

Our Dynamic Asset Allocator strategy offers a superior solution for risk-averse investors

quant DAAF - riding with dynamism

multi-dimensional research

multi asset, multi manager | multivariant analytics

"Analysis Adds Up"

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing across asset classes, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between investment managers, research analysts and analytics team – each with diverse sets of capabilities and experiences

FUND

ASSET ALLOCA

qGR's VLRT investment framework

dynamic money management

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform

A diverse set of variables and participants are continuously interacting with each other in myriad ways In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT]
