Investment Approach

Portfolio construction with maximum **30 large cap stocks (blue chips)**, as defined by SEBI.

Underlying theme is to **identify cross asset and cross market inflexion points**. Macro narrative guides our micro level stock selection.

Sector agnostic investment approach.

The fund adopts a **risk-off approach** to stock selection.

Reasons to Buy

- Large cap orientation allowing for **exposure to well-managed blue chip companies** exhibiting relatively stable earnings and growth.
- Blue chip stocks are perceived to be **less volatile and tend to deliver stable returns**.
- Companies in the portfolio enjoy high liquidity and driven by **strong managements**.
- Investment **track record of nearly 14 years**.

As per SEBI circular dated October 6, 2017 large cap companies means 1st - 100th company in terms of full market cap, mid cap companies means 101st - 250th company in terms of full market cap and small cap companies means 251st company onwards in terms of full market cap.

VLRT Framework| Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The **core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant**. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways**.

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT]**.
