	vii.SID shall be revised and updated immediately after completion of duration of the exit option (not less than 30 calendar days from the notice date). viii.A notice shall be given in respect of such changes which shall be displayed on the website of the AMC. ix.A written communication (including digital modes such as email/sms etc.) about the proposed change is sent to each Unitholder.						
Risk Profile of the Scheme	The Scheme is subject to the specific risks that may adversely affect the Scheme’s NAV, return and / or ability to meet its investment objective. The specific risk factors related to the Scheme include, but are not limited to the following: (i) Risks associated with Passive Investments: • As the Scheme proposes to invest not less than 95% of the net assets in the securities of the Underlying Index in the same proportion, the Scheme will not be actively managed. Performance of the Underlying Index will have a direct bearing on the performance of the Scheme. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets. Further, it is pertinent to note that there is no element of research recommendations involved before the execution of trades in the Scheme. The decision of the Fund Manager to execute trades including rebalancing required will be purely driven by the inflows and outflows in the Scheme and composition of the Underlying Index. (ii) Tracking Error / Tracking Difference Risk: The performance of the Scheme may not be commensurate with the performance of its benchmark index on any given day or over any given period. Tracking Errors are inherent in any fund based on index and such errors may cause the Scheme to generate returns which are not in line with the performance of the index. Tracking Errors may result from a variety of factors including but not limited to: • Fees & Expenditure incurred by the Scheme • Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions or expenses • The holding of a cash position to meet the Redemptions and other liquidity requirements) and accrued income prior to distribution and accrued expenses. • Accounting for indirect taxes including tax reclaims. (iii) Stock Liquidity in the event of Circuit Filter Liquidity of stocks which are available only in cash segment and not in F&O segment gets adversely impacted in the event of a circuit filter imposed by any of the stock exchanges. Further, this may result in gain/loss to existing unit holders when finally the purchase / sale of that stock is executed. This would also create tracking error while comparing returns with benchmark. <table><tr><th>Transaction type</th><th>Upper circuit</th><th>Lower circuit</th></tr><tr><td>Subscription</td><td> The Scheme shall buy stocks as per basket wherever no circuit, In case of Circuit on any stock(s) in the basket, the Scheme shall: 1. 	Redemption	NA	The Scheme shall sell stocks as per basket if no circuit. In case of circuit on Stock(s) in the basket, the Scheme shall: 1. Pay from cash or cash equivalent or create cash to pay for stocks on circuit at the latest available price on the stock exchange when the circuit was triggered by selling other stocks which may impact performance and result in tracking error; 2. Sell stock immediately when circuit is open and re-balance portfolio which may impact performance and result in tracking error.

(iv) Risk factors associated with investing in equities and equity related instruments

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges. Investment in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

(v) **Risk factors associated with investing in Fixed Income Securities** :The Scheme will invest not less than 95% of its corpus in the securities representing the Underlying Index as this Scheme endeavours to earn returns that correspond to the total returns represented by the Underlying Index. The Scheme will have insignificant cash or debt/money market investments. Therefore, the Scheme is not significantly susceptible to risks associated with debt/money markets.

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers

• Investment in Debt instruments are subject to varying degree of credit risk or default (i.e. the risk of an issuer's inability to meet interest or principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. The Investment Manager will endeavour to manage credit risk through in-house credit analysis. This may increase the risk of the portfolio.

• Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.

• Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

• Settlement risk: Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested, and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

• Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds.

• The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.

As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more

volatile than the market prices of securities that pay interest periodically.

(vi) Risk factors associated with investment in Tri-Party Repo

The Mutual Fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the Scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the Scheme may lose an amount equivalent to its contribution to the default fund.

(vii) General Risk Factors

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under 'Right to Restrict Redemptions' in Section 'Restrictions, if any, on the right to freely retain or dispose of units being offered'.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.
- The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

(viii) Risk factors associated with investing in Derivatives

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- Credit Risk: The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- Market Risk: Market movements may adversely affect the pricing and settlement of derivatives.
- Illiquidity risk: This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

(ix) Risks associated with Securities Lending :Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

(x)Risk factors associated for investments in Mutual Fund Schemes: Investing in mutual funds involves risks, including the potential impact of fluctuations in the Net Asset Value (NAV) of the underlying funds on the Scheme's performance. Changes in the investment strategies, objectives, or fundamental attributes of these funds can also affect the performance of the Scheme. Additionally, any redemptions from these funds may be subject to exit loads, which could further impact returns. Furthermore, the underlying funds may carry specific risks related to their own portfolios, such as market, credit, or liquidity risks, which may indirectly affect the Scheme's overall risk profile.

RISK MITIGATION STRATEGIES

The Scheme aims to track the NIFTY 100 Total Returns Index (TRI) before expenses. The index will be tracked on a regular basis and changes to the constituents or their weights, if any, will be replicated in the underlying portfolio with the purpose of minimizing tracking errors. The Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio would follow the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking errors. Thus, there would be no additional element of volatility or stock

	concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking errors. The Risk Mitigation strategy revolves around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental inflows into / redemptions from the Scheme. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.
Plans/Options	Investors are offered the following Investment Plan(s) to invest in the Scheme: The scheme offers Regular Plan and Direct Plan. Direct Plan Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Fund and is not available for investors who route their investments through a Distributor. Regular Plan Regular Plan is available for all type of investors investing through a Distributor. All the plans will have common portfolio. Options under each Plan(s) - Growth - Income Distribution cum Capital Withdrawal (IDCW) (Payout and Reinvestment Facility) Under the IDCW option, facility for Payout of Income Distribution cum capital withdrawal option (IDCW Payout) & Reinvestment of Income Distribution cum capital withdrawal option (IDCW Re-investment) is available. Between "Growth" or "IDCW" option, the default will be treated as "Growth". In "IDCW" option between "IDCW Payout" or "IDCW Reinvestment", the default will be treated as "IDCW Reinvestment".

**Applicable NAV
(after the scheme
opens for
repurchase and
sale)**

The first Net Asset Value will be calculated and disclosed not later than 5 business days from the date of allotment. Subsequently, the NAV will be calculated and disclosed for every Business Day. NAV of the scheme will be calculated up to four decimal places. AMC shall update the NAV on the AMFI website (www.amfiindia.com) and on the website of the Mutual Fund/AMC (www.quantmutual.com) by 11.00 p.m. every Business Day.

In case of any delay, the reasons for such delay would be explained to AMFI in writing. If the NAVs are not available before commencement of business hours on the following day due to any reason, Mutual Fund shall issue a press release providing reasons and explaining when the Mutual Fund would be able to publish the NAVs.

Information regarding NAV can be obtained by the Unit holders / Investors by calling or visiting the nearest ISC.

Total Liabilities and expenses	450,000	

Particulars	Amount (Rs)
Total Assets (A)	1,050,000
Total Liabilities and expenses (B)	450,000
Net Asset value = (A – B)	600,000
Total units outstanding	1,000
NAV per unit	600 per unit

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

The exit load shall not exceed three per cent of the Net Asset Value of the scheme as per Regulation 44(4) of SEBI (MF) Regulations, 2026.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2026 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.
Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2026, when the Applicable NAV

	= Rs. 10/- Therefore, Purchase Price = Rs. 10/- As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units. Redemption/Re-purchase of mutual fund units The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows: Redemption Price = Applicable NAV * (1 - Exit Load) Say, in the above example the exit load applicable is: •For exit on or before 12 months from the date of allotment – 1.00% •For exit after 12 months from the date of allotment – Nil. Scenario 1: Redemption is done during applicability of exit load In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2027; say December 1, 2026, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows: Redemption Price = Applicable NAV * (1 - Exit Load) = Rs. 12 * (1-1%) = Rs. 11.88/- Scenario 2: Redemption is done when the exit load is NIL In case the investor requests for redemption after 12 months i.e. after March 31, 2026; say April 1, 2027, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows: Redemption Price = Applicable NAV * (1 - Exit Load) = Rs. 12 * (1-0) = Rs. 12/- The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.		
Minimum Application Amount/ Number of Units	Purchase Rs. 5,000/- and in multiples of Re. 1/- thereafter. On continuous basis: Rs.5,000/- and in multiples of Re. 1/- thereafter	Additional Purchase Rs.1,000/- and in multiples of Re. 1/- thereafter	Redemption Rs.1/- or the unit balance whichever is less
Dispatch of Repurchase (Redemption) Request	Redemption: Within 3 working days of the receipt of valid redemption request at the Official Points of Acceptance of quant Mutual Fund for this Scheme or within such timelines as may be prescribed by SEBI / AMFI from time to time in case of exceptional circumstances or otherwise.		
Benchmark Index	Nifty 100 Total Return Index (TRI)		
Dividend Policy	Under the IDCW option, the Trustee will have the discretion to declare the IDCW, subject to availability of distributable surplus calculated in accordance with the Regulations. The actual declaration of IDCW and frequency will inter-alia, depend on availability of distributable surplus calculated in accordance with SEBI (MF) Regulations and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the Unit holders as to the rate of IDCW nor that it will be paid regularly.		

	The AMC/Trustee reserves the right to change the frequency of declaration of IDCW or may provide for additional frequency for declaration of IDCW.

Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 66 (4) and (5) respectively. In addition to the limits as specified in Regulation 66(7) of SEBI (MF) Regulations, 2026 or the Base Recurring Expenses (Base Expense Limit) as specified above, the following costs or expenses may be charged to the Scheme namely- • The Scheme may charge expense incurred towards brokerage, for the purpose of execution of trade, over and above the base expense ratio subject to a maximum of 0.06 per cent of trade value in case of cash market transactions and 0.02 per cent of trade value in case of derivatives transactions. The Investor may choose to provide or not provide the details of his nominee. Accordingly he shall choose to select the option provided under the application form of the scheme.

9. Waiver of Entry Load and Payment of commission and load structure:

No entry load will be charged by the Scheme to the investor. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Investors should note the following instructions for ensuring that the application is treated as a direct application:

1. Broker code, if already printed on the forms must be struck off and countersigned by the investors.
2. Ensure that the broker code block in the form is not left blank (i.e. it should be either struck off or indicated 'direct' or NA). However, if the investor does not specify the application as "Direct" or otherwise, then the AMC treats such applications as "Direct" in the interest of the investors.

10. Employee Unique Identification Number (EUID):

In order to assist in addressing any instance of mis-selling at any point of time, it is regulatory for every employee/relationship manager/sales person of the distributor/broker (interacting with the investor for the sale of Mutual Fund products) of mutual fund products to quote the EUID (for non-advisory transactions ('execution only') & advisory transactions) obtained from AMFI in the CAF. The EUID is a 7 digit unique alpha numeric number (one alphabet and six numerals). Individual ARN holders including senior citizens are also required to obtain and quote EUID in the Application Form. Hence, if your investments are routed through a distributor please ensure that the EUID is correctly filled up in the Application Form. It is further clarified that a mere quoting of EUID will not give an "advisory" character to the transaction. However, in case of any exceptional cases where there is no interaction by the employee/sales person/relationship manager of the distributor/sub broker with respect to the transaction, AMCs shall take the declaration separately signed by the investor, as mentioned on the top of the application form(s).

11. Units in Demat mode:

Units of qMF can be held by way of an Account Statement or in Dematerialized ("Demat") form. Unit holders opting to hold the units in demat form must provide their Demat Account details in the specified section of the CAF. In order to hold the units in Demat form, unitholders shall have a beneficiary account with the Depository Participant (DP) (registered with NSDL / CDSL as may be indicated by the Fund at the time of launch of the Plan) and will be required to indicate in the CAF the DP's name, DP ID Number and the beneficiary account number of the applicant with the DP. Applicants must ensure that the sequence of names and other details like Client ID, Address and PAN details as mentioned in the application form matches that of the account held with the DP. Only those applications where the details are matched with the DP data will be treated as valid applications. If the details mentioned in the application are incomplete/incorrect, not matched with the DP data, the application shall be treated as invalid and shall be liable to be rejected. Unit Holders opting the units in the demat mode, can submit redemption/switch only through DP or through stock exchange platform. In case Unit holders do not provide their Demat Account details, an Account Statement shall be sent to them. Such investors will not be able to trade on the stock exchange till the holdings are converted in to demat form.
