Portfolio Rebalancing

Short Term Defensive Consideration:

Subject to SEBI (MF) Regulations the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2.b of SEBI Master Circular on Mutual Funds dated June 27, 2024, as may be amended from time to time, such changes in the investment pattern will be for short term and for defensive consideration only.

In the event of change in the asset allocation, the fund manager will carry out portfolio rebalancing within 30 calendar days or such other timeline as may be prescribed by SEBI from time to time.

	<p>Portfolio Rebalancing (in case of passive breaches):</p> <p>As per clause 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024, as may be amended/ clarified from time to time, in the event of change in the asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager is required to carry out portfolio rebalancing within 30 Business Days.</p> <p>In case the portfolio is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to 60 Business Days from the date of completion of mandated rebalancing period. In case the portfolio of the investment strategy is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall follow the requirements specified under the aforesaid circular including reporting the deviation to Trustees at each stage.</p>
Investment Strategy	<p>The Scheme will invest in a portfolio of Large Cap, Mid Cap and Small Cap companies in line with the investment manager's views on the macro economy with a particular focus on the sentiments of the market participants through the interpretation of quant Money Mangers' predictive analytical tools and macro indicators. The emphasis will be on identifying companies with strong sustainable competitive advantages in good businesses and having sound managements. The fund managers will follow a dynamic investment strategy taking defensive/aggressive postures depending on the the overall risk-on / risk-off environment. In a risk-off environment, the scheme may invest substantially in money market instruments to protect the interest of the investors in the scheme.</p> <p>In line with SEBI's requirement for Multi cap schemes, the quant Active Fund will invest a minimum of 25% in equity & equity related instruments of Large Cap companies, 25% in equity & equity related instruments of Mid Cap companies and 25% in equity & equity related instruments of Small Cap companies. The remaining 25% will be invested based on the investment manager's views and accordingly allocated towards Large Cap, Mid Cap, Small Cap stocks and/or debt and money market instruments.</p> <p>The portfolio is reviewed consistently on the basis of the macro-economic environment and changes are made based on the data generated by our analytics and on the discretion of the fund manager. The change in the portfolio involves both sale and purchase, both partial and complete, of the existing stocks and purchase of new stocks, if any. In lieu of the overarching risk-on / risk-off environment, the scheme performs a strategic sector rotation in order to generate risk-adjusted returns.</p> <p>All investment decisions are based on quant money managers' investment framework – VLRT. In the face of this uncertainty and complexity, we have found consistent success by studying markets along four dimensions as opposed to limiting ourselves to any one school of thought: Valuation Analytics, Liquidity Analytics, Risk Appetite Analytics, and Timing.</p> <p>Valuation Analytics: Knowing the difference between price and value. Liquidity Analytics: Understanding the flow of money across asset classes. Risk Appetite Analytics: Perceiving what drives market participants to certain actions and reactions. Time: Being aware of the cycles that govern how the other three dimensions interact.</p> <p>The Scheme may invest in overseas financial assets for the purpose of diversification provided they are commensurate with the scheme's objectives, as and when permitted</p>

	<p>by SEBI/RBI. The value of investment in financial assets denominated in foreign currencies and domiciled outside India could be adversely affected by fluctuations in exchange rates as well as political risk, exchange controls and investment restrictions overseas.</p> <p>Portfolio Turnover Policy:</p> <p>Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time. Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. quant Active Fund is an actively managed open-ended equity scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities.</p> <p>There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.</p> <p>For detailed derivative strategies, please refer to SAI.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific risk factors are summarized below:</p> <p>The Scheme will be investing in equity & equity related instruments, preference shares, fixed income securities and REITs/InvITs. The Scheme is also subjected to risk factors associated with perpetual debt instruments, securities lending & short selling, Tri-Party Repo, Securitized Debt, Repo in Corporate Debt, derivatives, Credit Default Swap, Mutual Fund Schemes, Structured Obligation (SO) & Credit Enhancement (CE) rated securities and segregated portfolio as detailed in the SID.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
Plans/Options	<p>Investors are offered the following Investment Plan(s) to invest in the Scheme:</p> <p>The scheme offers Regular Plan and Direct Plan.</p> <p>Direct Plan</p> <p>Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Fund and is not available for investors who route their investments through a Distributor.</p> <p>Regular Plan</p> <p>Regular Plan is available for all type of investors investing through a Distributor.</p> <p>All the plans will have common portfolio.</p> <p>Options under each Plan(s)</p> <p>Growth Income Distribution cum Capital Withdrawl (IDCW) (Payout and Re-investment Facility)</p>
